Hi Boris-

I am working on some revisions that will correct this issue. I should have a pre-release build on the site by the end of the day - I will post here to let you know.

Best Regards-

Boris -

2.1.3beta is available for you to download in the "Pre-Release Builds" seccion of the downloads area.

Some of the new language strings have only been translated to English, and we have not updated our documentation yet, so if you have a question regarding anything, please let me know.

Best Regards-

Mark

Hi Mark,

It's OK now. It was apparently the downloaded file that was damaged.
