## Problems with date and time

Posted by Dan lecount - 2008/01/24 14:55

---

Component is not working. Booking notifications state 01 Jan 1970. Reservation Administrator front end is hanging when I look for reserved tables. Please can you contact me asap.

Hi-

I will use the login information you gave me previously to look around and get back to you when I see what is going on.

Best Regards-  
Mark

I found the problem and have modified the code on your site.

It is an issue with timestamp vs. datetime mysql types. I have never come across this issue before on all the systems I've installed and tested on, but I am grateful that you have pointed this inconsistency out. This fix will be included in the next upgrade.

---

got another problem now with the blackout tab in the reservation administrator hanging as previously happening on bookings. Is this due to the same problem as the above?

Yes-

I'll fix that for you right now.

Thanks for letting me know.

Best Regards-

Thanks again, is there functionality for this to only action the pay pal deposit when bookings of say 6 people or more are requested?

Also the email validation seems to have now stopped working. I get the email but the system again hangs when code is inserted. The link on the email brings up the following error:

```
'Fatal error: Call to undefined function: store() in  
home/topdrawm/public_html/components/com_tableboss/models/public.php on line 161'
```

Once the email validation is working, I will need to get this working on our live site. Will you be able to provide me with an updated zip of the component with the changes you have made for topdrawmedia.com?

Hi Dan-

I am buliding an upgrade package that should solve your email problem. It will be available shortly and will install correctly on your live site.

I just want to test it on a couple environments first. I will post here once it is available.

Best Regards-  
Mark

The latest pre-release build should solve most of your problems. I may include an option for the pay pal deposit situation described above as part of the next release.
